

Linear Regression On The Calculator Common Core Algebra 1 Homework Answers

1/4

(a) Before we start to work with setting up variables, expressions, and equations, let's first do some guess-and-check work. Try a few ages for Evie now, and see if any are correct. Think carefully about the information given in the question.

Now Eve 10 Dal 10+36 = 46 3 Years From Now

Evie 10+3=13

Dad 10+36+3=49

- 65 49
- (b) Set up careful let statements to define **expressions** that keep track of Evie's age and her father's age now and three years from now. Then, set up an equation that summarizes the information in the problem about their ages in five years. Then, solve the equation and check for reasonableness.

Now Let Evie's age = X Dad'tage
